SandeepSinghShekhawat

Skills

Languages
C,C++, Java, HTML, CSS, Javascript, Python, Mysql

Tools
VS Code, Google Colab, Replit

Python Libraries
Pandas, Numpy, Matplotlib, OpenCV

Others
OOPs, Problem Solving, Decision Making,
Active Listener

Experience

Analyst Intern, *kulturehire* 03-2024 – 06-2024
- Analyzed ”Career aspirations of Gen-Z” by defining the problem using the 5W1H method and collecting data via surveys and posts.
- Conducted data standardization and cleaning for further processing.
- Generated meaningful insights from the cleaned data and visualized the results.

Trainee, *LabView, NIIC* 06-2023 – 08-2023
- Gained experience in Python for Machine Learning, focusing on pre processing, EDA, data cleaning using pandas, numpy.
- Built a model for the dataset and integrated it into an web Application.

Projects

Face detection in Hospitals, *python, mysql, opencv*
- Focused on building an AI-based face detection system for hospitals to identify patients and retrieve their medical history, saving doctors’ time and reducing paperwork.
- Utilized an audio module that vocalizes reports.

E commerce web store, *Php, Html, Bootstrap, Xampp*
- Developed a responsive web application offering online various Books accessible through various payment modes, integrating Payment APIs for transactions.

Banking Application *Java*
- Designed and implemented a Java-based banking system supporting balance enquiry, deposits and withdrawals.

  Applied OOP principles to ensure modularity and maintainability.

Education

Sri Sairam College of Engineering, 2021 – present | Bengaluru, India
B.E in Artificial Intelligence and Machine Learning

Sri Sairam Pre University College, *PCMCs* 2019 – 2021 | Bengaluru, India

Navodaya Educational Trust, *SSLC* 2010 – 2019 | Bengaluru, India

Awards

Py Hunt Winner, *Webathon*

- Secured first prize in an inter-college coding competition comprising two rounds: The first round focused on dry run coding. The second round involved building a web application.

Best novelty award in 24hr hackathon

- Developed a home automation solution by embedding IOT applications with AI which helped me receiving the best novelty award.

Certificates

AZ-900: Microsoft Azure Fundamentals: Microsoft

Artificial Intelligence Primer Certification: Infosys Springboard

Python Foundation Certification: Infosys Springboard

Getting Started with Enterprise grade AI: IBM
